## **GOLDEN STATE FOODS SELECTS PAR TECHNOLOGY SUBSIDIARY'S MONITORING AND TRACKING SOLUTION FOR FOOD DISTRIBUTION**

---

NEW HARTFORD, NY PAR TECHNOLOGY CORPORATION (NYSE:PTC)

NEW HARTFORD, N.Y.—February 3 2010--- Par Logistics Management Systems Corporation (PAR LMS), a subsidiary of PAR Technology Corporation (NYSE: PTC), today announced that it has been selected by Golden State Foods (GSF) to provide its cold chain management solution to Golden State Foods' vast food distribution network.

Par's solution provides real-time monitoring of food product temperature on a continual basis during the transit cycle. The monitoring will also provide immediate alerts to truck operators and shipping managers to any variances in the food products during transit. This capability now affords Golden State Foods instant visibility into all product temperatures throughout their distribution network and routes and sets the standard for cold chain temperature monitoring and control in the food distribution industry. As part of Golden State Foods' initiative to provide the highest caliber of food product integrity in the industry, Par's product centric solution supports proactive controls and complete real-time information visibility and access into their daily operations.

“With today's selection of Par's monitoring and tracking solution, Golden State Foods has taken pro-active food safety standards to the next level,” stated Golden State Foods manager, Bill Pocilujko. “Our operations are now reorganizing around real-time management and tracking of food products and their constant temperatures during the cold chain delivery system. The Par LMS solution is far and above the best cold chain management system for our business. Golden State Foods believes that managing actual product temperatures during transit in real time is revolutionary to the industry and a best of breed practice for the future.”

Par LMS President John W. Sammon III commented, “Par has invested heavily in the creation and development of this ground breaking solution and we are particularly pleased by the quick adoption from Golden State Foods who immediately recognized it as an important technological advancement in the area of food safety. We believe that food safety, real time communications, and pro active logistics are now fundamental to the future of the cold chain industry. The ability for stakeholders to know, respond, and react, to food temperature issues immediately is now business critical on so many levels.”

### **About Golden State Foods**

Golden State Foods is one of the largest diversified suppliers to the foodservice industry, servicing more than 20,000 restaurants on three continents. Founded in 1947 the \$4 billion company is value based with proven performance in superior quality and customer service in both manufacturing and distribution.
