

# PAR Order Ready Boards

## Turn Pickup Chaos into Orderly Experiences.

In high-volume restaurant environments, order pickup can quickly become chaotic. When guests rely on verbal call-outs or staff interruptions to know when their order is ready, it creates congestion at the counter and distracts teams from food preparation. Order Ready Boards (ORB) use real-time POS events to display order status on in-store screens, showing guests exactly where their order is in the fulfillment process.

### The Problem

#### Chaos

High-volume pickup shouldn't rely on shouting names or crowded counters. Manual call-outs distract your team and frustrate your guests.

### The Solution

#### Clarity

ORB uses real-time PAR POS events to automate communication. Guests see exactly where their order stands—from "In-Progress" to "Ready"—on sleek, in-store screens.

Give guests real-time visibility with POS-powered status displays.

### Why Brands Choose Order Ready Boards

- ✔ **Automate Communication:** Stop the "Is my order ready yet?" interruptions.
- ✔ **Clear Traffic Jams:** Reduce congestion at the counter by managing expectations visually.
- ✔ **Stop the Shouting:** Free your team from manual callouts so they can focus on getting orders out the door.

### Why PAR Order Ready Boards?

- ✔ **Instant POS Sync:** Status changes are triggered the moment they happen in your PAR POS. No lag, no manual refreshes.
- ✔ **Configurable Workflows:** You define the journey. Customize when an order appears and what triggers it, such as when it moves from In-Progress to Ready.
- ✔ **Seamless Branding:** Don't just show a list—show your brand. Layouts and visuals are fully customizable to match your restaurant's aesthetic.
- ✔ **Built for Volume:** Specifically engineered for the rigors of high-traffic counter service, kiosks, and dedicated pickup hubs.

### Hardware Specifications:

|         |                              |
|---------|------------------------------|
|         | PAR Controller               |
| OS      | Windows 11                   |
