

Payment Services

Flexible

- Optimized with multiple integration paths with gateways and processors.
- Options to offset hardware purchases and features like cash discounting.
- Frictionless transactions in stores, online, curbside, and more.

Unified

- Complete commerce platform that scales with the business
- In house underwriting, onboarding, and support integrated into the PAR ecosystem for additional features and functionality

Transparent

- Straightforward, competitive pricing, and no hidden fees
- PAR controls the end-to-end experience, including support and data capture
- Receive support directly from the PAR team

Future-Focused

- Continuously investing and innovating in the latest payment industry trends.
i.e., tokenization, cash discounting

PAR Payment Services allows merchants to easily capture and leverage payments information with advanced insights into consumer behavior to simplify operations and help you grow.

PAR Payment Services is our merchant service offering providing restaurants with card payment processing, serviced and supported by PAR, and packaged in an easy, transparent, and competitively priced offering. It is sold direct and via channel and strategic partners using various pricing models. PAR controls the end-to-end experience from underwriting to onboarding to support.
