

Your Service, at the Speed of Sound

With nearly seven out of every ten guests never stepping foot through the restaurant's doors, it's clear that the drive-thru is a pillar of today's guest experience. PAR's Drive-Thru Timer Smart Speed of Service transforms restaurant drive thrus into service speedways, leveraging the power of gamification, real-time data, and drive-thru visualization to improve speed, accuracy, and quality for every order.

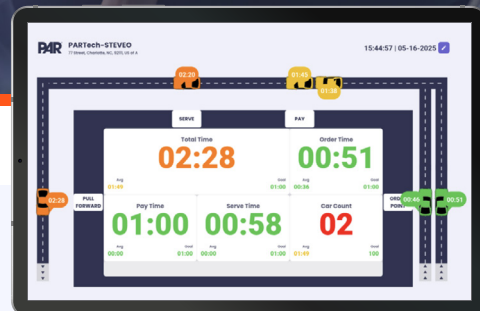

Drive-Thru Reporting Software: Power at Your Fingertips

Time is money – especially in quick service. Get the stats you need to run your operation smoothly, all in one place, accessible from anywhere.

With our Drive-Thru Statistical Reporting Software, you can:

- **Increase speed of service** and keep customers smiling.
- **Set goals** that actually drive results.
- **Reward your top performers** and boost morale.
- **Make smarter decisions** with data-driven insights.
