PAR Kiosk

SELF-SERVICE KIOSK

A self-service kiosk **built to fit your operation.**

Give customers a convenient way to order and pay, with the flexibility to fit your space, your software, and your payment terminal.

M8675A · ARM / Android

M8675 · Intel / Windows

THREE WAYS IT FITS YOUR OPERATION

The must-haves come standard

A rollout shouldn't start with a parts list. Printer and scanner are built in, and the payment arm is in the box.

Fits right into your layout.

Layouts differ and remodels move the ordering area. At 7.87" deep and 23.3 lbs, it moves to the wall or floor with a mount kit.

Works with what you already run.

New hardware shouldn't mean a new setup. Keep your payment terminal, and choose from an Android or Windows model.

Purpose-built for busy floors

Built to withstand temperature changes near windows and entryways, with a dust- and splash-resistant touchscreen for all-day tapping. Designed to stay in service as your needs change.

INCLUDED

- ✓ 21.5" portrait touchscreen
- ✓ Thermal receipt printer
- ✓ 1D/2D barcode scanner
- ✓ Payment bracket arm

ADD AS NEEDED

- \+ Wall mount kit or floor-stand
